SHAREKEEPER SLIP-39 RECOVERY SHEET

3 OF 5 | 20 WORDS PER SHARE | 4 LETTER PREFIX OF EACH WORD

1. Use each escrow's pre-verified contact details.
2. Ask for ciphertext groups 01-02 before giving personal information.
3. Compare the received groups with the expected ciphertext stored below.
4. Complete agreed ID checks; retain the notice of the 7-day release time.
5. Receive all 20 groups; verify the stored CRC32 before decryption.
6. Decrypt locally on scratch paper. Enter each four-letter word prefix into a HW
7. Destroy scratch paper after entering into a HW wallet.
8. Sign and broadcast a tx, then wipe the HW wallet clean.

LETTER / NUMBER CONVERSION

DECRYPT LOCALLY: P = (C - K) mod 26 K = pad / C = ciphertext / P = plaintext

Expected Ciphertext CRC32: 8 hex digits

ACCOUNTS / WALLET PASSPHRASES

One record per wallet. Preserve exact case and spaces; explicitly mark an empty passphrase. A public address helps verify the recovered wallet.

NO.	ACCOUNT / WALLET LABEL	PASSPHRASE - EXACT TEXT	FIRST KNOWN PUBLIC BTC ADDRESS
